AGREEMENT

Between

ORAL ROBERTS UNIVERSITY
Acting for and on behalf of its
TEACHER EDUCATION PROGRAM(S)

And

BIXBY PUBLIC SCHOOLS

For

TEACHER EDUCATION PROGRAM

THIS AGREEMENT is made and entered into this day of July 1, 2026, by and between **Oral Roberts University, acting on behalf of its Teacher Education Program ("University")**, and **BIXBY PUBLIC SCHOOLS OF TULSA COUNTY, OKLAHOMA, a/k/a BIXBY PUBLIC SCHOOLS ("BPS")**, and shall be effective on the last signature date set forth below, ending **June 30, 2027**.

WITNESSETH:

SECTION 1: BPS agrees to provide the authorization, supervision and instruction of student teachers/observers completing their student teaching portion of teacher preparation and to provide pre student teaching observation and participation activity in the Teacher Education Program.

SECTION 2: BPS agrees to accept for assignment to cooperating teachers in the public schools an agreed upon number of students enrolled in the University's Teacher Education Program. BPS further agrees the cooperating teacher will give direct supervision to the student teacher/observer assigned and will work with an assigned faculty member in directing and evaluating the student teacher/observer experience.

BPS further agrees to provide student teacher/observer supervision, instruction, mentoring or assistance, as needed by various staff members to enhance and develop the student teacher's/observer's ability to effectively educate children in an urban educational environment including, but not limited to, identifying, and serving children with disabilities, serving children from diverse socio economical populations, and serving children with foreign language barriers.

SECTION 3: All arrangements for the placement or removal of student teachers/observers will be coordinated through site administrators. If a student teacher fails to comply with the requirements of this Agreement or to perform to the satisfaction of BPS, the University will, upon written request by BPS, immediately remove that student teacher/observer from the school.

SECTION 4: The University and its student teachers/observers will comply with all applicable federal and state laws and regulations and will comply with all BPS policies, rules, and regulations (available for review at www.bixbyps.org) while on BPS premises or performing services under this Agreement. The University and its student teachers/observers will keep confidential and not disclose to any person or entity any records or other documentation, including progress notes which may constitute student records as defined in the Family Educational Rights and Privacy Act unless such disclosure is authorized under the Act or pursuant to court order.

SECTION 5: This Agreement shall be governed by, and construed in accordance with, the laws of the State of Oklahoma. Any action arising out of or relating to this Agreement or to its breach shall be brought only in the federal state courts sitting in Tulsa County, Oklahoma, and both parties must submit to exclusive jurisdiction of such courts. Nothing contained herein shall constitute a waiver by either party of sovereign immunity or of immunity of benefits afforded by the Eleventh Amendment to the constitution of the United States of America.

SECTION 6: To the extent allowed by law, each party shall save and protect the other, and indemnify the other from all legal liability resulting in injury, death, or damages, including costs and attorney fees, caused by or arising out of the indemnifying party's negligent or willful misconduct in the supervision of students pursuant to this agreement or resulting from the negligent or intentional acts or omissions of the parties, its student teachers, officers, agents, employees, or contractors.

SECTION 7: It is not the intention of the parties to form a joint venture or partnership. This Agreement shall not be construed to create an employment or agency relationship between the University and BPS or any of their respective employees, student teachers or agents. BPS and the University shall, at all times, act and function pursuant to this Agreement and hold themselves out as independent contractors. The University agrees and affirms that all University employees entering upon BPS property under the provisions of this Agreement are and shall be covered by worker's compensation insurance to the extent required by applicable law and that BPS shall, in no event, be required to provide such coverage for the University's student teachers and employees.

SECTION 8: BPS and the University agree that student safety is a top priority. In an effort to protect the students' safety, the University agrees that it will not place any individual on BPS property, whether as a student teacher, officer, agent, employee, or contractor, if that person has been convicted of a felony or has been convicted of any crime involving moral turpitude. The University hereby certifies that none of its student teachers and none of its employees working on BPS property are currently registered or required to be registered under the provisions of the Oklahoma Sex Offenders' Registration Act or the Mary Ripsey Violent Offender Registration Act. The University shall submit written proof to BPS that all student teachers and faculty supervisors coming on to BPS property have passed background checks. While there is no drug/alcohol screening requirement for the University student teachers and faculty supervisors, they shall be subject to drug/alcohol testing pursuant to the District's policies and regulations regarding such matters as if they are employees of the District (www.bixbybys.org). All University employees and student teachers must have in their possession, at all times, a current photo ID which identifies them as a student teacher or employee of the University and, if required by BPS, a BPS photo ID authorizing access to a specific BPS site. If at any time a student teacher or University employee demonstrates actions which are inappropriate or create a disruption within a school, the principal may require that such person leave BPS property and not return without specific permission of the principal, and District personnel.

SECTION 9: Neither BPS, nor its employees, shall receive compensation from the University for services performed under this Agreement in support of the University's Teacher Education Program. The University may, however, with BPS's consent, pay a reasonable and customary honorarium to cooperating teachers or, alternatively, may provide cooperating teachers a tuition waiver to enroll in a University course upon completion of their supervision of a student teacher.

SECTION 10: All notices to be made under this Agreement shall be made in writing and delivered by personal delivery by commercial delivery service, or by certified United States mail return receipt requested, to the following addresses:

If to the University: Oral Roberts University
Attn: Provost
7777 S. Lewis Ave.
Tulsa, Oklahoma 74717

If to BPS: Bixby Public Schools
Attn: Lydia Wilson
Superintendent
23 S. Riverview Dr.
Bixby, Oklahoma 74008

SECTION 11: This Agreement sets forth the entire agreement between the parties as to the subject matter hereof, and supersedes all prior agreements, understandings, negotiations, and discussions, whether oral or written.

SECTION 12: Either party may terminate this Agreement, without cause, upon sixty (60) days' written notice. Student teachers/observers enrolled in the University's Teacher Education Program and assigned to a BPS site at the time such notice is given will be afforded the opportunity to complete their assignment notwithstanding such early termination.

ADDENDUM TO AGREEMENT

Parents' Rights

Pursuant to the 2023 Oklahoma "Parents' Bill of Rights" (OAC 210:10-2-3), no District employee and no Independent Contractor shall encourage, coerce, or attempt to encourage or coerce a minor child to withhold information from the child's parent or guardian. The District requires employees to disclose to parents/guardians any information known to the District or its employees or an independent contractor regarding material changes reasonably expected to be important to the parent/guardian regarding their student's health, social, or psychological development, including identity information. Disclosure of this information shall occur within 30 days of learning the information and may include referrals for appropriate counseling services that parents may use at their discretion. Any parent or guardian alleging a violation by the District of OAC 210: 10-2-3 shall provide a written complaint to the State Department of Education. Any violation by an Independent Contractor that the district knew or should have known about shall be attributed to the district responsible for the contract. "Identity information" means information including, but not limited to, any names or pronouns used by a student at school and any social transition or other transition to a gender that differs from the student's sex. "Sex" means the physical condition of being male or female based on genetics and physiology, as identified on the individual's original birth certificate.

"Independent Contractor" means an individual, organization, or entity that is engaged by and/or contracted by the district to provide services or instruction, whether directly or indirectly, to students or within the district on a temporary contractual basis and is not an employee of the district.

Background Checks

The vendor shall ensure that all employees or subcontractors who will have direct contact with students or access to school property have undergone and passed a comprehensive background check, including but not limited to criminal history, sex offender registry, and child abuse and neglect checks, prior to the commencement of any services under this agreement. The vendor must provide evidence of the background check results to the school district upon request. The school district reserves the right to reject any vendor or individual based on background check findings that are deemed unsuitable for the safety and well-being of students and staff.

IN WITNESS WHEREOF, the University and BPS have executed this Agreement as of the day and year first written above.

RE: Alternative Education Abbreviated Day Deregulation - OAC 210:35-29-2 (Five Instructional Day Requirement)

Dear Members of the State Board of Education,

On behalf of Bixby Public Schools and Bixby Alternative Center, I am writing to respectfully request an Alternative Education Abbreviated Day Deregulation waiver of OAC 210:35-29-2, which requires five days per week of instruction for all students in alternative education programs.

Bixby Alternative Center serves students who benefit from flexible and personalized educational approaches that address the unique academic and behavioral needs of our students. Specifically, we seek to operate on a four-day week with extended class hours for our students at this site. Fridays would be reserved for those who need additional small group academic support, one-on-one tutoring, and personalized interventions. In the past, we have seen 28%-50% of students attend school on Fridays to get the targeted support they need.

Granting us this waiver will allow us to prioritize academic achievement and individualized interventions that are responsive to the individual needs of our students, all while meeting the standards required by the state. We greatly appreciate your consideration of this request.

Sincerely,

Lydia Wilson

Superintendent, Bixby Public Schools

26-27 Deregulation Waiver Section 3 Q&A:

Section 3:

1. Reason for the request. Please include how your students would benefit from this deregulation, what alternative means will have to be employed, and negative effects on your alternative education population if your deregulation was to be denied.

Bixby Alternative Center is requesting a waiver of OAC 210:35-29-2, which requires five days of instruction for all students enrolled in an alternative education program. Our request is grounded in the need to provide a flexible, student-centered instructional model that better serves the academic, behavioral, and emotional needs of our students. Students attend school Monday through Thursday from 8:50 a.m. to 3:51 p.m., following the Bixby High School instructional calendar. However, unlike the high school, which operates on a six-hour instructional day, Bixby Alternative Center provides seven hours of daily instruction, allowing us to embed more content and relationship-building opportunities throughout the week. Rather than offering a 30-minute daily intervention period like the high school, we dedicate Fridays to targeted academic and behavioral interventions, ensuring students receive more meaningful and focused support.

On Fridays, students enrolled in Bixby High School courses are required to attend, as are students at risk of failing or those behind in coursework. These students engage in small-group academic support, one-on-one tutoring, and personalized interventions. On average, 25–45 of our 90 students (approximately 28%–50%) are on campus during the day on Fridays based on academic need and progress.

If this waiver were to be denied, we would be required to transition all students to a five-day in-person instructional model. This change would limit our ability to offer targeted support, increase student disengagement, and reduce valuable time for one-on-one interventions that are critical to student success in an alternative setting.

Approval of this waiver will benefit 100% of our student population, as it allows us to maintain a schedule that is both rigorous and responsive—providing extended instructional time Monday through Thursday, and preserving Fridays for focused intervention that directly supports student growth and achievement.

2. List alternate strategies/plans which the district/site proposes, and how this plan will best serve the students of your alternative education program, i.e., a description of the educational benefits to the students, graduation rate if a waiver has been awarded prior to this year, and the result of the previous year's alternative education audit.

The Bixby Alternative Center proposes to continue a modified instructional week model that includes four full days of in-person instruction (Monday–Thursday) and a targeted intervention day on Fridays. This approach provides a structured, consistent academic environment while allowing for intensive, individualized support based on student need. The approval of the waiver

for the 2025–26 school year allowed Bixby Alternative Center to formally implement this model while continuing to meet required instructional hours.

Our key strategies include:

- **Extended Instructional Time:** Students receive seven hours of instruction daily, compared to six hours at the traditional high school. This allows us to deliver high-quality core content while embedding relationship-building, social-emotional support, and classroom routines that promote consistency and stability.
- **Targeted Friday Interventions:** Fridays are used strategically for students requiring additional support. Students who are enrolled in Bixby High School courses attend those classes on site, while students who are behind in coursework are required to attend for small-group remediation, credit recovery, progress monitoring, and behavior interventions. Students who are successfully progressing in their coursework may be exempt from Friday attendance. This approach allows staff to focus on individual student needs without the constraints of a full class schedule.
- **Flexible, Responsive Programming:** The flexibility of this model promotes higher engagement and lower absenteeism, particularly among students who struggle with traditional schooling. It also helps reduce student anxiety and burnout, which can be significant barriers to success in an alternative education setting.
- **Relationship-Driven Instruction:** The additional instructional hour each day allows for deeper student-teacher relationships, stronger mentorship, and a culture of accountability. These relationships are foundational to student success in our program and help provide the consistency and stability many of our students need.

This model is designed to increase credit attainment, support on-time graduation, and strengthen academic achievement. During the 2025–26 school year, the first year in which the waiver was approved, the model contributed to stronger assignment completion, more consistent student engagement, fewer disciplinary concerns, and improved opportunities for students to recover credits and remain on track for graduation. The waiver provided the structure and flexibility necessary to better meet the unique academic and behavioral needs of our students while maintaining compliance with required instructional hours.

The program will continue to monitor credit attainment, course completion, attendance, discipline, and graduation outcomes to measure the effectiveness of the model. During the 2025–26 school year, Bixby Alternative Center graduated all but 7 students, demonstrating the program's continued focus on helping students successfully complete their graduation requirements.

The results of the previous alternative education audit were reviewed as part of the program's continued planning and evaluation. We are continuing to collaborate with community

stakeholders and establish more individual time to work one on one with students who are below grade level to remediate. The district has used the audit feedback to continue strengthening program procedures, documentation, student support systems, and progress monitoring.

We believe that maintaining this flexibility, supported by the waiver, will allow Bixby Alternative Center to continue providing a highly personalized and effective educational environment for our most at-risk students. The modified instructional week allows us to maintain a consistent academic structure while providing targeted intervention and individualized support, ultimately giving students additional opportunities to earn credits, improve engagement, and graduate on time.

3. Describe the method used to assess or evaluate the effectiveness of the plan for both staff and students (e.g., TLE, ACT scores, graduation rates, RSA data, School Report Card indicators) and explain the educational impact on the district, including effects on student performance levels and projected graduation rates.

To evaluate the effectiveness of the modified instructional week and targeted intervention model at Bixby Alternative Center, we will implement a multi-faceted assessment strategy using both quantitative data and qualitative feedback for staff and students. This approach ensures we are monitoring academic progress, behavioral improvement, and instructional quality with fidelity.

We will monitor and assess the effectiveness of our instructional model using the following student-focused metrics. We will track annual cohort graduation rates, including the number of students who graduate on time and those who graduate through extended pathways. We will compare this data year over year to measure growth and success in our program. Since many students enter the Alternative Center credit-deficient, we closely monitor credit attainment each semester. The intervention-based Friday model supports timely credit recovery, and success will be measured by an increase in students earning sufficient credits each term. Students' pass/fail rates, particularly in core content areas, will be reviewed quarterly to evaluate the effectiveness of both core instruction and targeted Friday interventions. We will track daily attendance and Friday participation data to ensure students are engaging meaningfully in the flexible schedule. Improved or sustained attendance will indicate a positive impact of the model. We will continue to review and respond to state accountability data such as academic growth, chronic absenteeism, and postsecondary readiness indicators to align our interventions with areas needing improvement. For students preparing to transition out of high school, we will monitor ACT participation and performance, as well as their development of Individual Career Academic Plans (ICAPs). BTSS - Our district version of the Oklahoma Tiered Intervention System of Support (OTISS) involves monthly collaborative meetings with district leadership, site administration, and relevant support staff to review both academic and behavioral data. During these meetings, students are identified and categorized into Tiers 1 through 3, allowing us to monitor progress, implement targeted interventions, and make informed decisions about support strategies. This process not only guides individualized student planning but also informs

Professional Learning Community (PLC) discussions and drives the focus of staff professional development, ensuring that instructional practices align with the evolving needs of our students.

Staff effectiveness will be monitored through the Oklahoma TLE Evaluation System. Teachers and staff are evaluated using the Oklahoma Teacher and Leader Effectiveness (TLE) framework. We will continue using formal and informal observations, goal-setting conferences, and student performance data to assess instructional quality. As we continue to focus on trauma-informed practices, student motivation, and differentiated instruction, staff will participate in ongoing PD. We will use implementation checklists, feedback surveys, and walkthrough observations to assess how PD translates into classroom practices. We meet weekly as a team to review student data, plan Friday interventions, and adjust supports. The effectiveness of this collaborative model is assessed through student performance, fewer behavioral referrals, and the ability to proactively support struggling students.

Together, these methods will ensure we maintain high standards of instructional quality and student achievement, and that the proposed waiver continues to deliver measurable benefits to the students and staff it is designed to support.

The statutory waiver of OAC 210:35-29-2 has driven a transformative, measurable shift for Bixby Alternative Center while offering a valuable blueprint for the rest of the district. Moving from a standard schedule to an intentional four-day instructional model anchored by a dedicated Friday intervention day has fundamentally improved how teachers deliver instruction and how students engage with learning.

Extending the Monday through Thursday schedule to seven daily instructional hours gives teachers the necessary room for deeper academic support and stronger relationship-building. On Fridays, the environment shifts: students requiring additional help receive targeted, small-group or individualized intervention without missing new classroom material, while those on track maintain momentum uninterrupted. This dedicated balance keeps classroom quality high across the board and directly fuels higher assignment completion rates, improved attendance among at-risk students, and consistent academic progress.

For students entering the Alternative Center that are behind in credits, this structure serves as a critical engine for credit attainment and on-track graduation. Fridays provide essential recovery time, allowing them to catch up seamlessly alongside weekly instruction rather than falling further behind. Beyond these individual gains, the model actively advances district-wide goals for equity and data-driven learning. Insights from the Tiered Intervention System of Support and Friday intervention data directly guide professional development and professional learning communities (PLCs) while sparking broader district conversations on leveraging flexible scheduling to elevate struggling learners across all secondary sites.

(f) **Ticketing Event Review.** To the extent Client selects Facilitron Tickets, the Client shall review and approve event listings submitted by a school or by a renter organization prior to public posting on the Event Management Portal.

Memorandum of Understanding Oklahoma State University Institute of Technology and Bixby Public Schools 2026-2027

This Memorandum of Understanding (MOU) between Bixby Public Schools, Bixby, Oklahoma, ("partner"), and Oklahoma State University Institute of Technology (OSUIT), an agency of the State of Oklahoma, sets forth the responsibilities and obligations of the parties with regard to concurrent enrollment of high school students.

OSUIT is dedicated to serving its area high school students while also fostering their transition to higher education. Concurrent enrollment through OSUIT provides students with an opportunity to earn transferable college credits while satisfying high school course requirements and introduces them to college academics and rigor. This program also provides students with an economical head-start to paying for college through the utilization of concurrent enrollment tuition waivers for OSUIT courses taught at OSUIT locations or at approved concurrent sites during the regular school day. Through the concurrent enrollment program, students receive access to certain OSUIT academic resources and institutional services, as applicable to the specific course and enrollment arrangement.

1. Purpose

The purpose of this agreement is to foster increased access to college courses for high school students who have demonstrated the academic ability to complete a rigorous course of study. By using partner facilities to offer OSUIT courses, eligible students have an opportunity to participate in college courses in a familiar environment. Students will earn high school academic credit and college credit as established by the Oklahoma Legislature in 70 O.S. §628.13.

2. Term

The agreement will be in continuous effect beginning in the fall 2026 semester unless terminated in writing by either institution. Either party shall have the right to terminate this MOU with or without cause by giving one hundred eighty (180) days prior written notice of intention to terminate pursuant to this provision, specifying the date of termination. The parties agree to work in good faith to avoid any such termination. The rationale for the requested termination should be stated with the request, and the parties will attempt to resolve any disputes in a mutually satisfactory way. Any future agreements will be subject to their own terms for termination, which may differ from this memorandum of understanding.

3. Operations

A. OSUIT will ensure the following conditions:

- Admit high school students to the University according to the Oklahoma State Regents for Higher Education (OSRHE) requirements.
- Offer courses based on student demand and the ability of OSUIT to staff the requested courses.
- Provide each qualified student with a concurrent enrollment tuition waiver in alignment with the policies of the OSRHE.
- Post high school concurrent enrollment documents on the OSUIT website (OSUIT Admission Application).
- Process all concurrent enrollment applications received prior to August 15th for fall courses and December 15th for spring courses and ensure suitable arrangements are made to administer all approved off-site concurrent course sections that meet minimum enrollment requirements.
- Advise concurrent students on issues concerning academic success and higher education goals including course transferability, college majors, and pathways to Associate in Science, Associate in Applied Science and Bachelor of Technology degrees and certificate programs.

- Provide distance and/or classroom delivered instruction for courses as agreed upon by OSUIT and the partner.
- Comply with OSUIT's policies, practices, and procedures.
- Administer courses to follow a fourteen (14) week format and the established OSUIT calendar as it relates to add/drop dates, withdrawal dates, holidays, and unscheduled closings.
- Provide OSUIT student ID cards to each concurrent student who presents an OSUIT ID number and photo identification to the OSUIT Admissions Office. The ID card will provide students with access to the OSUIT Library, Covelle Hall and the University's online resources.
- Allow students to participate in courses on OSUIT's campus during the fall, spring, and summer term, as well as in the fall and spring concurrent courses taught at partner sites. All enrollments beyond the maximum nine (9) hours for high school juniors and eighteen (18) hours for high school seniors per year will be charged full OSUIT tuition.
- Post end of term grades to OSUIT transcripts for all concurrently enrolled students via entry into the Banner system.
- Send student mid-term and final grades to authorized high school personnel, as indicated on the concurrent enrollment form.
- Provide an early alert system via email to the high school personnel who have authorized and signed the concurrent enrollment form.
- Administer the release of student education records in accordance with the Family Educational Rights and Privacy Act (FERPA). Student authorization for the release of education records to authorized partner personnel is obtained through the OSUIT concurrent enrollment application process. As a concurrently enrolled postsecondary student, the student's FERPA rights take effect on the first day of class.
- ADA accommodations: OSUIT requires students to self-identify and submit appropriate professional documentation in accordance with the guidelines established by the Academic Accommodations Office located on the Okmulgee campus in the Learning Resource Center LASSO Center and may be contacted at 918.293.4855.

B. The partner will ensure the following conditions:

- Provide adequate safety and security while faculty and students are at the site.
- Provide the instructor with access to multimedia equipment, internet access, computer hardware, and software as required by course syllabi. Ensure reliable Wi-Fi access is available to students at the partner site; students are responsible for providing their own devices.
- Provide dedicated classroom space.
- Provide a collegiate environment free from classroom interruptions. This includes but is not limited to announcements, staff entering the classroom, classroom orderliness, and room changes.
- Partner high school counselors and advisors should continue to advise concurrent students on all issues concerning high school education, graduation, and college application requirements.
- Ensure that students have an opportunity to enroll in courses necessary for high school graduation. OSUIT courses may not be available or convenient for some students so should not be depended upon as the sole source for completing high school graduation requirements.
- Allow concurrently enrolled students to comply with the OSUIT student policies and resources handbook during OSUIT class time. Students are enrolled in OSUIT classes until they withdraw or are administratively withdrawn by OSUIT.
- Provide program information and enrollment due dates to partner school counselors in advance of registration periods, supporting counselors in communicating this information to students and parents.
- Facilitate use of OSUIT's fourteen (14) week format for all concurrent courses and reinforce University expectation that students will follow the established OSUIT calendar as it relates to add/drop dates, withdrawal dates, holidays, and unscheduled closings.
- Ensure a minimum of fifteen (15) students for any in-person class taught at the partner site. If this condition is not met, the class will shift to an online format. OSUIT and the partner will notify affected students and parents

before the section is converted. A student whose in-person section is converted to an online format will incur the mandatory fee structure described in Section 4 for that course and term.

C. Obligations of both OSUIT and Partner:

- Collaborate to provide program information, communication, promotional materials, and activities.
- Collaborate to articulate curricula between the high school and the University.
- Collaborate to develop a pathway of academic course offerings. The course schedule will be reviewed annually.
- Work closely together when advising a concurrently enrolled student to ensure that the student is informed of all educational options.
- Clearly communicate to students and parents all financial responsibilities and expectations of the college environment through the admissions process, enrollment materials, and student-facing communications.
- Collaborate to develop a finals schedule for OSUIT courses delivered at the partner site.

D. High School Concurrently Enrolled Students Will:

- Meet the minimum concurrent enrollment requirements as set forth by the Oklahoma State Regents for Higher Education. Admission and enrollment requirements are included in the University catalog and on the concurrent enrollment form.
- Complete the OSUIT concurrent enrollment packet that includes a completed concurrent form with required signatures, high school transcript, and placement testing scores (ACT®, Pre-ACT® [10th Grade], SAT®, PSAT® 10, and/or ACCUPLACER®). Student must identify and record the prefix, number, and CRN of the course(s) of planned enrollment on the application for concurrent enrollment.
- Pay for tuition and fees not covered by the concurrent enrollment tuition waiver either at the OSUIT Bursar's Office or online at my.okstate.edu.
- Follow OSUIT's fourteen (14) week format for all concurrent courses and the established OSUIT calendar as it relates to add/drop dates, withdrawal dates, holidays, and unscheduled closings.
- Obtain required textbooks and instructional materials for each enrolled course.
- Comply with the OSUIT Student Rights and Responsibilities (Student Code of Conduct) during all OSUIT coursework and class time, behaving in a manner consistent with expectations for any enrolled college student. Additionally, comply with the Bixby Public Schools student handbook while at the concurrent course site.

CERTIFICATE OF EXCISE BOARD

State of Oklahoma, County of Tulsa

We, do further certify that we have examined the statement of estimated needs for the current fiscal year ending June 30, 2026, as certified by the Board of Education of Bixby Public Schools, District Number I-4 of said County and State, and its financial statement for the preceding year, and in so doing we have diligently performed the duties imposed upon this Excise Board by 68 O. S. 2001 Section 3007, by (1) ascertaining that the financial statements, as to the statistics therein contained, reflect the true fiscal condition at the close of the fiscal year, or caused the same to be corrected so to show; (2) struck from the estimate of needs so submitted any items not authorized by law and reduced to the sum authorized by law any items restricted by statute as to the amount lawfully expendable therefor; (3) supplemented such estimate, after appropriate action, by an estimate of needs prepared by this Excise Board to make provision for mandatory functions based upon statistics authoritatively submitted; (4) computed the total means available to each fund in the manner provided, applying the Governing Board's estimate of revenue to be derived from surplus tax of the immediately preceding year and from sources other than ad valorem tax, or reduced such estimate to not less than the lawfully authorized ratio of the several sums realized from such sources during the preceding fiscal year or to such lesser sum as may reasonably be anticipated under altered law or circumstance and using for such determination the basic collections of the preceding year and the ratios on which distribution or apportionment must be made during the ensuing or current year.

To the several and specific purposes of the estimated needs as certified, we have and do hereby appropriate the surplus balances of cash on hand of the prior year, estimates of income from sources other than ad valorem taxation within the limitation fixed by law, and the proceeds of ad valorem tax levy within the number of mills authorized, either by apportionment by the Legislature, allocation by the excise board or by legal election, all of which appropriations are made in so far as the available surpluses, revenues, and levies will permit, except in that we have also provided that, after deducting items consisting of cash and the revenue from all sources other than the 2026 tax and the proceeds of the 2026 tax levy are in excess of the residue of such appropriations, by a sum included for delinquent tax, computed at 10.0% of such residue. And provided further, if said School District has been ascertained to be a well defined State Aid District, the local budget, as approved and appropriated for, has been applied wholly to its operating accounts.

We further certify that the amount required to be raised from tax, excluding Homesteads, for General Revenue Fund purposes as approved, requires a total ad valorem tax levy of 35.000 Mills. Said levy is within the statutory limit, and if in excess, is within the constitutional limit and has been authorized by a vote of the people of said district, as shown by certificate of the School Board to-wit:

To this District, with valuations shown below, the Excise Board allocated 5.000 Mills, plus 15.000 Mills authorized by the Constitution, plus an emergency levy of 5.000 Mills; plus local support levy of 10.000 Mills; for a total levy for the General Fund of 35.000 Mills.

We further certify that the amount required to be raised for building fund purposes as approved requires a tax levy of 5.000 Mills, and said levy has been certified as authorized by a vote of the people at an election held for that purpose. We further certify that Assessed Values used in computing Mill-vote levies have been applied as certified by the County Assessor.

We further certify that we have examined the within statements of account and estimated needs or requirements of the Governing Board of Bixby Public Schools, School District No. I-4 of said County and State, in relation to the Sinking Fund or Funds thereof, and after finding the same correct or having caused the same to be corrected pursuant to 68 O. S. 2001 Section 3009, have approved the requirements therefor to fulfill the conditions of Section 26 and 28 of Article 10, Oklahoma Constitution, and have made and certified a tax levy therefor to the extent of the excess of said total requirements over the total of items 2, 3, 6, and 12 of Exhibit Y and any other legal deduction, including a reserve of 10.0% for delinquent taxes.

North Intermediate

CHASE MORRIS ACT COMPLIANCE SITE PLAN

North Intermediate has developed a sudden cardiac emergency response plan. The district has collaborated with the local/responding EMT **Matt Dickerson** on **10/11/24**.

SUDDEN CARDIAC EMERGENCY RESPONSE TEAM:

The team **MUST** include a school administrator. The school or administrator will determine other team members and number to be on the team.

<i>Team Member</i>	<i>Role</i>
Libby VanDolah, Principal	Overhead HOLD & Chase Morris announcement to implement the team and activate the code; Calls 911, SROs, fire & EMT. Make a copy of student's emergency information for EMS once they arrive; contacts the student's parent or guardian. Pivots to guide responding arriving responders and family, supports with crowd control. Sends an alert to all staff to remain on HOLD as needed.
Sherrill Maxwell, Health Clerk	Grabs AED and initiates CPR and AED
Kati Hartin, Speech Pathologist	Back up/Secondary CPR & AED assist (First floor)
Nicole Williams, Building Secretary	Scribe/record keeper. Writes down what time calls are made: HOLD and CODE, SROs, 911; records when actions are initiated: CPR start, AED activation, EMS arrival, parent arrival, etc. Documents all details from event initiation until student departs BNI.
Kelly Zilmer, Librarian	Moves into Hartin or Bailey's room for coverage during assistance
Amanda Wann, Assistant Principal	Activates VanDolah if needed; Bypasses AED and heads straight to the scene. Serves as a 3rd backup for CPR & AED. Stays with student & responders throughout the process until student departs BNI. Will detail to parents events that occurred until they arrived.
Mikki Bailey, Teacher	Back up/Secondary CPR & AED assist (Second floor)
John LeFrere, PE Coach	Grabs second AED and stands as backup as needed.

IDENTIFY APPROPRIATE SCHOOL STAFF TO BE TRAINED IN FIRST AID, CARDIOPULMONARY RESUSCITATION, AND THE USE OF AN AED

Amanda Wann, Assistant Principal
Sherrill Maxwell, Health Clerk
Kati Hartin, Speech Pathologist

Mikki Bailey, Teacher
John LeFrere, Coach

HOW TO ACTIVATE THE TEAM:

If a student experiences a medical emergency, the teacher or staff member closest to the student will remain with the student while directing another staff member or a student to immediately contact the office and notify them of a medical emergency, naming what area/room of the building they are in.

Libby VanDolah will do an all call on the intercom stating, "Hold. In your room or area. Clear the halls. Chase Morris to room (XX). I repeat, hold. In your room or area. Clear the halls. Chase Morris to room (XX). VanDolah will then contact 911 and local SROs.

All on-site responders will pass an AED on their way to the event. There is one in the front office and one in the cafeteria.

If the AED has already been taken to the event, the door will be left open. This will prompt all responders that the AED is already on its way to the scene.

Primary responders (Maxwell and designated floor responder) will follow the CPR plan of care until first responders arrive. Wann and Williams will remain on the scene until victim and emergency responders have left the school.

HOW WILL THE PLAN BE COMMUNICATED AND DISSEMINATED THROUGHOUT THE SCHOOL?

1. Meeting with all Chase Morris team members to review and agree to plan.
2. At the first faculty meeting, we will review the plan with all teachers and staff as outlined above.
3. One drill each semester to ensure everyone knows their roles and responsibilities.

Definition: Sudden Cardiac Arrest (SCA) is a potentially fatal condition in which the heart suddenly and unexpectedly stops beating. All staff and Cardiac Emergency Response Team (CERT) members must be prepared to perform the duties outlined below. Immediate action is crucial in order to successfully respond to a cardiac emergency.

Causes: SCA is caused by several structural and electrical diseases of the heart. These conditions predispose an individual to have an abnormal rhythm that can be fatal if not treated within a few minutes. Most conditions responsible for SCA in children are inherited, other possible causes of SCA are a sudden blunt non-penetrating blow to the chest and the use of recreational or performance-enhancing drugs and/or energy drinks.

What are the symptoms/warning signs of Sudden Cardiac Arrest?

- Fainting/blackouts (especially during exercise)
- Dizziness
- Unusual fatigue/weakness
- Chest pain
- Shortness of breath
- Nausea/vomiting
- Seizure like activity or convulsions
- Palpitations (heart is beating unusually fast or skipping beats)
- Family history of sudden cardiac arrest at age < 50

ANY of these symptoms/warning signs that occur while exercising may necessitate further evaluation from a physician before returning to practice or a game.

What is the treatment for Sudden Cardiac Arrest?

- Time is critical and an immediate response is vital.
- CALL 911
- Begin CPR
- Use an Automated External Defibrillator (AED)

Athletic Trainer, Christa Montgomery: (405) 564-3974

- 1) **Recognize** the following signs of sudden cardiac arrest and act quickly in the event of one or more of the following:
 - The person is not moving, unresponsive, or unconscious.
 - The person is not breathing normally (has irregular breaths, gasping, or gurgling or is not breathing at all).
 - The person appears to be having a seizure or is experiencing convulsion-like activity. If it is a seizure the AED will not deliver a shock.
 - If the person receives a blunt blow to the chest, this can cause a cardiac arrest event called commotio cordis.
- 2) **Facilitate** immediate access to professional medical help:
 - Call 911 as soon as you suspect SCA.
 - Provide school address, cross streets, and patients' condition. Give exact location and provide the recommended route for ambulances to the venue. Remain on the phone with 911. If able, bring your phone to the patient's side and put on speaker.
 - Immediately contact members of the CERT team,
 - Make sure gates are unlocked and someone is flagging down the ambulance.
 - CERT member, proceed to the scene of the cardiac emergency.
 - Closest team member should grab the AED
- 3) **Start CPR:** Begin continuous chest compression and while someone retrieves AED.
 - Press hard and fast in the center of the chest, at a 100-120 compressions per minute. (faster than 1 per second, but slower than 2 per second.)
 - Use two hands: the heel of one hand and the other hand on top for people over 8, with a depth of at least 2 inches. For children 8 and younger use one hand and a depth of 1/2.
 - Follow any directions given by the 911 operator.
 - If you are able and comfortable giving rescue breaths, please use a barrier and provide 2 rescue breaths after 30 compressions.
- 4) **AED:** use the nearest AED
 - When the AED is brought to the patient's side, press the power-on button, and attach the pads to the patient as shown in the diagram on the pad. Then follow the AED's audio and visual instructions. If the person needs to be shocked to restore a normal heart rhythm, the AED will deliver one or more shocks. Be familiar with your AEDs and if you will need to press the shock button or if it will deliver automatically.
 - i) The AED will only deliver a shock if it is needed.

- Minimize interruptions of compressions when placing AED pads to the patients bare chest.
 - Continue CPR until the patient is responsive or an ambulance has arrived to take over. Make sure to rotate persons doing compression to avoid fatigue.
- 5) Transition Care to EMS**
- Once EMS arrives, there should be a clear transition of care from the CERT to EMS.
 - Team focus should now be on assisting EMS safely out of the building/parking lot.
 - Provide EMS a copy of the patient's emergency information sheet if needed.
- 6) Action taken by office/administrative staff**
- Confirm the exact location and the condition of the patient.
 - Activate the Cardiac Emergency Response Team and give the exact location.
 - Confirm that the Cardiac Emergency Response Team has responded. Confirm that 9-1-1 was called. If not, call 9-1-1 immediately.
 - Assign a staff member to direct EMS to the scene.
 - Perform "Crowd Control" – directing others away from the scene.
 - Notify other staff: medical staff, athletic trainer, athletic director, safety director, safety manager, and/or sports facilities manager, etc.
 - Consider medical coverage to continue to be provided at the athletic event if continued after the event.
 - Consider having people in the location stay in place (i.e. delaying area traffic or other changes) to facilitate CPR and EMS functions.
 - Designate people to cover the duties of the CPR responders.
 - Copy the patient's emergency information for EMS.
 - Notify the patient's emergency contact (parent/guardian, spouse, etc.).
 - Notify staff and sports attendees when to return to the normal schedule.
 - Contact organization administration, human resources and/or sports facility management.
- 7) Debrief**
- Discuss the outcome of the cardiac emergency. This shall include but not be limited to a summary of the presumed medical condition of the person who experienced the cardiac emergency to the extent that the information is publicly available. Personal identifiers should not be collected unless the information is publicly available.
 - An evaluation of whether the CERP was sufficient to enable an appropriate response to the specific cardiac emergency. The review shall include recommendations for improvements to the Plan and in its implementation if the plan was not optimally suited for the specific incident. The post-event review may include discussions with medical personnel to help in the debriefing process and to address any concerns regarding on-site medical management and coordination.
 - An evaluation of the debriefing process for responders and post-event support. This shall include the identification of aftercare services including aftercare services and crisis counselors.

Role of First on Scene:

- Immediate care/survey of patient
- Activation of EMS
 - Contact EMS and provide patient name, age, DOB, detailed location, number of individuals injured, treatment given, directions, and any other information needed
 - Contact Certified Athletic Trainer
- Start chest compressions and send someone to get the AED
- Direct EMS to scene
 - Open appropriate doors or gates immediately.
 - Designate an individual to flag down ambulance and direct to scene
 - Scene control: direct bystanders away from the area

Role of Athletic Trainer:

- Assess scene and determine plan
- Organize and communicate as needed
- Take over on CPR or apply AED while first on scene continues CPR

Role of Coaches/Administrator:

- Administration: Assist in situations. Call 911., if not done. Flag down Emergency personnel. Unlock gates if needed. Clear EMS path.

Role of Head Coach:

- Contact parents or guardians
- Gather parent consent form and history form to give to EMS if needed

Role of Assistant Coaches:

- Get AED if not retrieved
- Call admin if they are not on scene
- Scene control: direct players away from the area

Every situation and venue will be different. Please communicate with coaches and other staff to ensure each person is aware of their designated role and responsibilities if an emergency arises.

Bixby Athletics Emergency Action Plan

EAP

One of the first lines of defense for catastrophic injuries is a comprehensive, detailed plan for most scenarios. This is commonly referred to as an Emergency Action Plan (EAP).

The EAP provides information to ensure response to an emergency is rapid, appropriate, controlled and precise. All personnel involved with the organization of athletic activities share a professional and legal responsibility to ensure that guidelines are in place to manage any emergency that could arise.

While being comprehensive, an EAP also needs to be flexible enough to be applicable to any emergency. While health care providers are usually responsible for the writing of this document, all those involved with athletic teams (athletic directors, team physicians, athletic trainers, coaches, strength and conditioning coaches, local EMS services) need to be aware and knowledgeable with its contents.

Purpose

As Bixby employees, we must be prepared to cope with direct and indirect physical effects of any disaster or emergency which occurs within our district. Athletic trainers, coaches and game managers have a unique opportunity to respond to emergencies in a planned and scripted manner that minimizes potential injury or death to students, athletes and spectators.

It is imperative for coaches and game managers to understand they have a responsibility and the authority to act on situations in the absence of a healthcare provider or administrator. The emergency action plans in this guide are site-specific and follow step-by-step procedures.

Coaches and game managers should be familiar with these procedures and keep this document in the facility office, field, gym, or practice facility for easy and quick accessibility in case of an emergency.

Assumptions

All coaches, game managers, spectators and student-athletes are vulnerable to emergencies and disasters. Preparedness is the key to limiting the negative impact of any disasters.

Goals

To outline a predetermined plan of action that can be used to respond to emergencies or disasters. To increase the security and safety of coaches, game managers, spectators and

student-athletes. To minimize damage or loss. To return to a normal functioning level as soon as possible by diminishing chaos and confusion.

The emergency action plan (EAP) addresses immediate need for medical assistance in the occurrence of traumatic injury or illness. The EAP assigns specific duties for effective evaluation, transport and follow-up of the situation, and must address situations that may occur at any time throughout the year.

This plan may be used for any sport, for any site where the team practices and/or competes. It must be available at any time. It should also include additional information specific to a unique site.

Should an injury occur which requires medical assistance; the following are critical items that will need to be addressed by an athletic trainer (AT), coach, designated first aid responder and/or administrator.

- | | |
|---|---|
| ☐ Determine level of consciousness. | ☐ Call Athletic Trainer if not on site |
| ☐ Check the athlete's airway, breathing, and circulation (pulse) | ☐ Call 911. On campus phone 9-911 |
| | ☐ Send for AED |

Notification of parent/guardian.

Coaches must have a copy of a student physical and emergency authorization on hand for quick access. This can be accessed through RankOne.

The student's parent/guardian or a coach must accompany an injured athlete to the hospital. In case of a catastrophic injury, no information should be given to any party other than EMS.

Heat Illness Protocol

The below protocols/policies are set forth by the Oklahoma Secondary Schools Activities Association. Effective July 1, 2026.

XLVIII. EXTREME HEAT

The OSSAA recognizes that heat related illness is the leading cause of preventable death in high school students participating in activities. The OSSAA Board adopted the following policies:

Acclimatization Period: Whenever students are participating in an environment, in which the temperature cannot be controlled there should be an acclimatization period. The acclimatization period is defined as the **first 14 days** of participation beginning with the first date of practice in that sport or activity, or the first date a participant begins practice, whichever is later. Any speed, strength, or conditioning programs shall not be considered a part of the acclimatization period. All students participating in athletics or activities, including those who arrive to preseason practice after the first day of practice, are required to follow the guidelines of the first days of the acclimatization period.

All athletic coaches are required to view *A Guide to Heat Acclimatization and Heat Illness Prevention* at the [NFHS](#) website annually. A certificate of completion shall be kept on file for each coach or marching band director at the member school.

Guidelines for outdoor activities:

Athletic coaches should use a smart-phone app or other mechanism or program to get heat index, such as the Perry weather app.

- All practices should be held under the supervision of a coach, director, or sponsor employed by the school.
- Practices should always be conducted with an open water policy.
- Each program should have a heat related emergency plan on hand at all times.
- Preseason practice should be avoided if possible between the hours of 12:00 p.m. and 6:00 p.m.
- Parents and students should be educated on the importance of hydration during extreme heat conditions.
- Cooling stations should be made available when possible
 - buckets of cool water
 - wet towels

- sponges
- Equipment should be removed or limited for conditioning, as needed.

Exertional Heat Illness Protocol

Activity in hot or humid environments can easily cause a number of heat related illnesses. Heat illness can occur in anyone at any time. The signs and symptoms listed below usually do not occur in a stepwise manner and can change rapidly depending on the person, situation, and activity. All signs and symptoms should be treated as serious and help sought out immediately.

Heat Exhaustion

Heat exhaustion is the most common heat-related condition observed in active populations. It is defined as the inability to continue exercise in the heat due to cardiovascular insufficiency (not enough blood pumped to the heart) and energy depletion that may or may not be associated with physical collapse. Cardiovascular insufficiency refers to when the heart has difficulty providing enough oxygenated blood to all the working organs and muscles and is exacerbated by dehydration via extreme sweating without replacing fluids during exercise.

It is important to note that heat illnesses are not on a continuum and that one condition does not lead to another condition, although having heat exhaustion one day can predispose an individual to heat illness the next day.

How do you prevent heat exhaustion?

Individuals should adapt to exercise in the heat gradually — acclimatize — over 10-14 days by progressively increasing duration and intensity of work in hot conditions. Athletes should recognize heat exhaustion and exertional heat stroke signs and symptoms to indicate the need to slow, modify, or stop activity before a medical emergency arises.

Being adequately hydrated before and during exercise can help prevent heat illnesses including heat exhaustion. Maintaining blood volume is key in the prevention of heat exhaustion.

Appropriate work to rest ratio based on environmental conditions is necessary in the prevention of heat illnesses. Increasing rest break durations as ambient temperature increases is warranted.

What puts an individual at risk for heat exhaustion?

- Exercising in a hot and humid environment (air temp > 91.4°F).

- Inadequate fluid intake before or during exercise resulting in dehydration.
- Inappropriate work to rest ratios with too much work compared to rest breaks.
- Body mass index > 195 lb/ft.

Look for these symptoms in athletes when heat exhaustion is suspected:

- | | |
|--------------------------------|---|
| • Fatigue | • Decreased Urine Output / Dehydration |
| • Nausea | • Irritability |
| • Fainting | • Headache |
| • Weakness | • Sodium Loss |
| • Vomiting | • Decreased Blood Pressure |
| • Dizziness / Light-headedness | • Decreased Muscle Coordination |
| • Pale | • Hyperventilation |
| • Chills | • Sign-Core body temperature between 36-40.5°C (96.8- 105°) |
| • Diarrhea | |
| • Heavy Sweating | |

How do you treat an individual with heat exhaustion?

Individuals experiencing heat exhaustion should respond quickly to treatment. If not, exertional heat stroke should be suspected.

To treat heat exhaustion:

- Move the individual to a cool/shaded area and remove excess clothing
- Elevate legs to promote venous return
- Cool the individual with fans, rotating ice towels, or ice bags
- Provide oral fluids for rehydration

When can the individual return to activity?

Returning to activity the same day of an episode is *not* prudent or advised. Individuals should wait at least 24-48 hrs. Before returning to activity, athletes should gradually increase intensity, volume of exercise, clothing, and equipment. Medical clearance is recommended to rule out other conditions.

Heat Cramps

The mechanism of heat cramps is unknown but they can be caused by dehydration or lack of adequate electrolytes in the diet. Although muscle cramping is not a cause of sudden death, it

can be confused with a more serious condition, exertional sickling (cramps with no palpable muscle contraction).

Heat cramps are painful involuntary cramping often in the legs, arms, or abdomen with muscle contraction that can easily be felt. Heat cramps usually occur in the preseason-conditioning phase when the body is not properly conditioned and more subject to fatigue. Heat cramps can easily be treated with rest, stretching the muscle, and rehydration of fluid and electrolytes.

How do you prevent heat cramps?

It may be impossible to completely prevent a cramp from occurring; however, certain factors can be modified in order to reduce the incidence of future heat cramps.

The most effective ways to prevent heat cramping in athletes include:

Acclimatizing the athlete to warm/hot environments if their sports require exercise in hot environmental conditions can help prevent heat cramps. Athletes should acclimatize to exercise by gradually progressing intensity and duration before requiring them to perform all out in an event or extensive workout session.

Educate athletes to replace fluids and salt lost in their sweat. Each athlete slightly differs in the amount of sweat and salt lost during exercise. Also, keep in mind that these factors change depending on the temperature and humidity of the ambient environments.

Maintain a balanced electrolyte level by consuming electrolyte rich drinks before and during the athletic event or practice session if physical activity lasts longer than one hour in duration. Certain individuals naturally expel more sodium in their sweat compared to others. These people may need supplemental/extra sodium in their diet. [Learn how to calculate your sweat rate here.](#) Ksi.uconn.edu Korey Stringer Institute for heat illness.

Removing excess clothing/equipment during physical activity may help reduce the chance of getting heat cramps by allowing for greater evaporation thus keeping core body temperature lower during exercise. For example, if a football player is performing conditioning drills during which protective equipment is unnecessary, the athlete should remove the equipment during this portion of the conditioning session.

What puts an individual at risk for heat cramps?

- Exercising in heat when the individual is not acclimatized to the hot conditions.

- Profuse sweating or body water loss during exercise. These athletes lose a considerable amount of electrolytes through their sweat, which predisposes them to heat cramping.
- Exercising for an extended duration of time or participating in multiple practice sessions per day without replenishing the salts and water lost during sweating.
- Muscular fatigue.
- Wearing additional layers of clothing, protective gear, or equipment.

Look for these signs and symptoms in athletes when heat cramps are suspected:

- Dehydration, thirst, sweating, transient (short-term) muscle cramps, and fatigue.
- Painful, involuntary muscle spasms (usually occurring in the legs) associated with exercise in the heat when athletes have been sweating profusely.
- A precursor to the initial onset of cramps involves muscle twitches or fasciculations. If this occurs, remove the athlete from the heat and encourage rehydration with an electrolyte beverage.

How do you treat the individual?

- Remove the athlete from the exercise session, workout, or practice and have them rest in the shade or an air conditioned room.
- Stretch, massage, and knead the muscle that is cramping in its full-length position (joints should be extended).
- Provide the athlete with cold fluids such as water or an electrolyte sports drink to replace sweat losses.
- Provide food high in salt content to replenish the electrolytes lost from sweat. If this is not available consider providing a solution of 1/2 teaspoon salt dissolved in 16-20 ounces of water prior to or post cramping.

How do you know if these are heat cramps?

Heat cramping is often confused with exertional sickling, but may be differentiated by the following ways.

Symptoms/Factors	Heat Cramps	Exertional Sickling
------------------	-------------	---------------------

Pain Factor	More excruciating pain; can be pinpointed to a location	Pain is strong; however, is more generalized over body
State of Muscles	Muscles “lock-up”; Visibly contracted and rock hard	Muscles are weak; athletes slump, push through instances of collapse
Physical Symptoms	Athletes may writhe or yell in pain	Sickling athletes lie fairly still without yelling
Presence of muscle twinges	Yes	None
Occurrence during workout/session	Occurs during or after intense workouts (after 30 minutes)	Generally occurs within first half hour during intense workouts
Body temperatures	Athlete's core temperature is elevated	Athletes core temperature is not greatly elevated

When can the individual return to activity?

Once an athlete has rested and replenished the fluids and electrolytes lost from their sweat, they can usually return to play during that same exercise session or practice

Hyponatremia: the level of sodium in your blood is too low, usually falling below 135 mEq/L.

- Common Signs: Nausea and vomiting, headaches and confusion, muscle cramps or weakness
- Main Causes: Drinking too much water during heavy exercise. Health issues like heart, kidney, or liver failure and certain medicines like water pills (diuretics)

Assess/differentiate between hyponatremia and heat stroke.

Activate EMS immediately if hyponatremia is suspected; do not administer fluids until a physician is consulted.

Heat Stroke

While exertional heat illnesses (EHI) are not always a life-threatening condition, exertional heat stroke (EHS) can lead to fatality if not recognized and treated properly. While not all EHS cases are preventable, schools and institutions should have the equipment and supplies ready and available to properly assess and treat an EHS case. A full EAP on exertional heat stroke is outlined in the next section.

How to reduce the risk of exertional heat stroke.

- Make sure your emergency action plan (EAP) is consistent with the most recent guidelines for preseason heat.
- Acclimatize individuals over a 10-14 day period.
- Educate other medical staff, athletes, coaches, emergency personnel, and parents about exertional heat illnesses and proper hydration.
- Ensure proper body cooling methods are available, including a cold-water immersion tub, ice towels, and access to water and ice.
- Encourage hydrating throughout the day and at practice and ensure hydration through comparing their urine to color charts.
- Establish hydration policies: encourage drinking both water and fluids containing sodium.
- As athletes acclimatize they will sweat more and therefore need to replace a greater amount of fluids during the course of the workout.
- Wear loose-fitting, light colored, and moisture wicking clothing.
- During hot or humid conditions minimize the amount of equipment and clothing worn.
- Sleep at least 8 hours and eat a well-balanced diet.
- Minimize warm-up time and practice in the shade when feasible.
- Practice and perform conditioning drills at appropriate times during the day. Try to avoid the hottest part of the day (10am–5pm).
- Work with coaches and administration to follow acclimatization guidelines.
- Slowly progress the amount of time and intensity of conditioning and practices throughout the season.

What puts an individual at risk for heat stroke?

Exercise extra caution if an athlete has any of these intrinsic factors or you are concerned regarding any of the extrinsic factors.

Intrinsic Factors

- | | |
|-----------------------------------|--------------------|
| ● History of EHI | ● Lack of sleep |
| ● Inadequate heat acclimatization | ● Fever |
| ● Low fitness level | ● Stomach illness |
| ● Overweight or obese | ● Highly motivated |
| ● Inadequate hydration | ● Pre-pubescent |

Extrinsic Factors

- Intense or prolonged exercise with minimal breaks
- High temperature/humidity/sun exposure/high wet bulb globe temperature (WBGT)
- Exposure to similar conditions the previous day
- Inappropriate work/rest ratios based on intensity
- Clothing/equipment/fitness level
- Lack of education and awareness of heat illness among coaches, athletes, and medical staff
- Limited access to fluids or breaks during practice
- Delay in recognition of signs and symptoms associated with EHS

Look for these symptoms in athletes when exertional heat stroke is suspected:

- | | |
|---|--|
| • Rectal temperature greater than 102°F (39°C). | • Collapse, staggering or sluggish feeling |
| • Irrational behavior, irritability, emotional instability | • Profuse sweating |
| • Altered consciousness, coma | • Decreasing performance or weakness |
| • Disorientation or dizziness | • Dehydration, dry mouth, thirst |
| • Headache | • Rapid pulse, low blood pressure, quick breathing |
| • Confusion or just look “out of it” | |
| • Nausea or vomiting | |
| • Diarrhea | |
| • Muscle cramps, loss of muscle function/balance, inability to walk | |

Other outside factors may include:

- They are out of shape or obese
- It is a hot and humid day
- Practice is near the start of the season, and near the end of practice
- First day in full pads/equipment

Exertional Heat Stroke Treatment: Follow these steps to initiate emergency treatment

- Remove all equipment and excess clothing. Cool the athlete as quickly as possible via whole body ice water immersion. Every second matters for the safety of the athletes. It is vital to get an accurate core temperature.
- Place the athlete in an ice bath with water approximately 35–59°F; stir water and add ice throughout the cooling process. Make sure the athlete is supported to keep their head above water, as they may lose consciousness.

- If immersion is not possible (no tub or no water supply), take athletes to a shaded, cool area and use rotating cold, wet towels to cover as much of the body surface as possible.
 - Remove patient when core body temperature reaches 102°F
- After cooling has been initiated, activate the emergency medical system by calling 911.
- Monitor vital signs such as rectal temperature, heart rate, respiratory rate, blood pressure and CNS status.

Exertional Heat Stroke Emergency Action Plan

Initial response: once exertional heat stroke is suspected, prepare to cool the patient immediately and contact emergency medical services (EMS) once cooling has been initiated.

COOL FIRST, THEN TRANSPORT

- Determine vital signs before immersing the exertional heat-stroke patient
- Assess core body temperature with a rectal thermometer, which is a flexible thermometer that stays in place during cooling and allows for continuous monitoring of temperature during immersion.
- Check airway, breathing, pulse, and blood pressure.
- Assess the level of central nervous system dysfunction.
- Begin ice water immersion. Place the athlete in the ice water immersion tub. Medical staff or coaches may be needed to assist with a smooth and safe entry and exit.
 - Use a water temperature between 35-59°F.
 - Cover as much of the body as possible with ice water while cooling. If full coverage is not possible, cover the torso as much as possible.
 - Place an ice/wet towel over the head and neck while the body is being cooled in the tub.
 - To keep the athlete's head and neck above water, an assistant may hold the victim under the armpits with a towel or sheet wrapped across the chest and under the arms.
 - During cooling, water should be continuously circulated to enhance the water-to-skin temperature gradient which optimizes cooling.
- If cold-water immersion is not available, then cool via the best available means. An alternative is a cooler filled with ice, water, and towels. Place ice cold towels all over their body and leave on for 2-3 minutes, then repeat the process. Another alternative is cold water from a locker room shower or from a hose.
- Vital signs should be monitored and documented at regular intervals.
- It may be helpful for an assistant to stand nearby in case the athlete becomes combative. Other assistants may be needed to lift or roll the athlete if vomiting occurs.
- Continue cooling until the patient's rectal temperature lowers to 102°F.
- If rectal temperature cannot be measured and cold-water immersion is indicated, cool for 10-15 minutes and then transport to a medical facility.

Lightning Protocol

The Bixby Athletic Department has adopted the following lightning protocol. This protocol is based on the National Athletic Trainers' Association Position Statement: *Lightning Safety for Athletics and Recreation* and The National Federation of State High School Associations: *Guidelines on Handling Practices and Contests During Lightning or Thunder Disturbances*.

- The athletic trainer on site and game manager for competition and/or practice will assume the responsibility and make the final decision if the practice or competition will cease and when it will resume.
- At the beginning of each season the head coach will designate a chain of command as to who monitors threatening weather.
- The athletic trainer & designee will be aware of National Weather Service (NWS) issued thunderstorm watches and warnings as well as the signs of thunderstorms developing nearby. A watch means that conditions are favorable for severe weather to develop in an area; a warning means that severe weather has been reported in an area and for everyone to take the proper precautions.

The athletic trainer & designee will know where the closest safe shelter is to the field or playing area and know how long it takes to get to that safe shelter.

- A safe shelter is defined as (1): any building normally occupied or frequently used by people, i.e. A building with plumbing and or electrical wiring that acts to electrically ground the structure or (2): any vehicle with a hard metal roof (not convertible or golf cart) and rolled up windows. (3): Structures should be fully enclosed.
 - When people are in the safe shelter buildings, it is important that the showers and or plumbing are not used during the thunderstorm.
- When using a vehicle with a hard metal roof it is important that the sides of the vehicle are not touched as they dissipate the lightning around the vehicle.

In the event of severe weather when lightning conditions are probable, Perry Weather will be used as the recognized method of determining dangerous lightning situations.

- **Perry Weather:** Perry Weather is a tracking software which will assist in determining lightning distance and when it is safe to return to the field of play. There is a weather monitoring station located on the roof of Small Whitey Ford Field House. This station will sound a brief siren when lightning is within the 10 mile radius. When it sounds all

outdoor venues need to be cleared immediately. There is a weather *dashboard link* that will be sent out to coaches at the beginning of the year, which should be bookmarked. This should be used in conjunction with observation and audible thunder.

By this method all parties involved will be notified when lightning is recognized within 10 miles. Once lightning conditions are detected within 10 miles of the practice or event site, all activity will be suspended. All individuals should be moved to the designated safe areas. Return to practice or competition will not resume until 30 minutes following the last indication of lightning conditions within the 10-mile range. Any subsequent lightning or thunder after the beginning of the 30-minute count will reset the clock and another count should begin.

Other safety guidelines to keep in mind and communicate to others include: It must be remembered that the existence of blue sky and the absence of rain are not protection from lightning. Lightning can, and often does strike as far as 10 miles from the rain shaft. It does not have to be raining for lightning to strike.
