Legislative Action Committee – 2007 Platform

December 2006

The school board of Wayzata Public Schools and its Legislative Action Committee (LAC) has established the following legislative priorities for the 2007 session:

Appropriate and Stable Investment in Education

The financial issues that affect school districts are multi-faceted, complex and interrelated. School funding must be considered from a systemic perspective to achieve an appropriate and stable investment in education. In order to provide school districts with this level of funding and to improve the ability of local school boards to plan for future years, we recommend that the Minnesota Legislature address the following issues:

- Provide general education funding that is increased by at least the rate of inflation and establish a clear, long-term vision for investing in schools
- Revise the current education funding formula to provide resources necessary to allow school districts to meet high academic standards. The revised formula should also include the following:
 - Recognize and fund regional labor cost differences
 - Modify the equity levy formula to eliminate drastic reductions in revenue for districts whose referendum revenue places them over the 95th percentile
 - Restore special education formula growth factors to account for inflation and phase in increases for the state special education entitlement, currently prorated at 82.6 percent
- Fully restore the reductions in ECFE funding that were made in 2003, pay the entire cost of mandated early childhood screening and increase school readiness funding to serve all qualifying families.

More Reliance on Local Decision Making

Although all schools share the common goal of providing their students the best education possible, school districts vary greatly in many other aspects including size, number of schools, labor and transportation costs and level of parent involvement. Given these differences, Wayzata Public Schools believes that local school boards should be given the discretion and flexibility to make decisions that are best for their district. In order to allow for local decision making and flexibility, we recommend that the Minnesota Legislature address the following issues:

- Oppose any legislation that would mandate school districts to participate in a statewide health insurance pool.
- Oppose any legislation that would mandate school districts to spend a specific percentage of the annual budget on regular classroom instruction. Local districts should be allowed to spend financial resources on areas that best meet local needs.
