Subject: Consider approval of XIO quote for Data Storage Server

New Business

Action

BACKGROUND INFORMATION

After extensive study and hands on learning, we have found that the IOPS (read/write times) of our current storage system is not adequate for our VDI (virtual desktop) deployment. The current data storage server is working perfectly for our file storage and it is still needed for our expanded storage that we are now experiencing and will continue to experience as we move forward. We have experienced a two fold increase in storage just this school year alone as teachers create online courses, curriculum infused with technology, and students increasingly create projects online.

ITEM ADDRESSED

Calallen ISD would like to purchase the attached storage for our VDI (HS terminals) project, and utilize our current storage system that we are using for VDI to replace all our other existing storage and backup servers (cheetah, lynx, calmedia08, Moodle). Aside from additional, protected storage, this move will allow use to reduce physical hardware and electricity consumption.

XIO has given us a guarantee that their storage will support our current needs (300 workstations) and up to 500 more desktops all logging in simultaneously (total of 800). Our independent study of VDI requirements supports their claims. Purchase and installation of the equipment found in the attached quote will insure that daily use and upcoming EOC testing online will be possible as planned as well as future expansion.

RECOMMENDED ACTION

The Administration recommends the Board approve the expenditure to XIO for \$66,082.33.
