Medina Valley High School 2020 Senior Graduation Ceremony Plan

Thank you to all the seniors and their parents for being patient with us as we work through the details for graduation while also following orders from the Governor and TEA. We would like to ensure that our seniors are recognized with a ceremony they deserve. At this time, we still plan to hold a regular graduation ceremony on June 5th if allowed. If we are unable to hold the regular graduation on June 5th, then we plan to hold a parade for our seniors at the High School, with them picking up their diplomas on the morning of June 6th. If we are not able to have graduation on June 5th, then we would try again for a regular graduation ceremony on June 26th, or again on July 17th if needed. If we are unable to hold a regular ceremony on July 17th, we will go to our last resort of a Virtual Graduation on July 31st.

To Recap:

Option #1 - Regular Senior Graduation on June 5th @ 8 PM.

*If we are unable to have the regular senior graduation ceremony on that date, then we will have a Senior Parade for students to pick up their diplomas on the morning of June 6th (more details to follow).

Option #2 - Regular Graduation 2nd attempt, if allowed, on June 26th @ 8 PM.

Option #3 - Regular Graduation 3rd attempt, if allowed, on July 17th @ 8 PM.

Option #4 - If we are unable to meet any of the above options then we would have Virtual Graduation on July 31st.

Note: The Senior Shining PAWS Awards and Scholarship Night will be done virtually at a date to be determined.

See the training section of this document and contact the Ford Training Center at 800-654-6744 for additional information. Ford highly recommends that the basic mixing console training session be video recorded, by the Customer, for future reference.

- 2) One (1) 24-input x 12-output expander shall be provided and installed in the equipment rack to provide access to the digital mixer.
- 3) Eight (8) hanging condenser mics shall be provided and hung in two sections across the stage in order to capture audio and send to the mixer for presentation through the audio system.

2. THE CUSTOMER SHALL BE RESPONSIBLE FOR:

- a. The Customer shall have a representative (one [1] person selected by the Customer) available throughout the installation to make decisions on behalf of the Customer concerning the installation. The purpose is to ensure that communication between the Customer and Ford is accurate and responsive in the event of questions or problems that may arise during installation.
- b. The Customer shall clear the rooms involved in the installation of all activities during the periods of installation. Ford will work with the Customer to schedule the installation. Hours or days of work lost by the installation crew due to the inability to work as planned will be charged to the Customer based on the extra labor and expenses required.
- c. The Customer shall provide a facility that is prepared for the installation of electronic equipment. This includes a clean, dust-free and air-conditioned environment that is secure and quiet. The Customer is responsible for providing a secure job site and for the cost of loss or damage to audio, video, and lighting equipment delivered by Ford to the job site.
- d. Electrical Power

In the event that electrical power is required to be installed or conduit systems are required to support the audio/video systems, it is the responsibility of the Customer, at their expense, to provide complete and adequate electrical power and conduit, unless otherwise noted.

- e. Providing and preparing adequate space for the location of equipment, speakers, speaker clusters, subwoofer cabinets, distributed under and over balcony speaker systems, stage monitor systems, equipment racks, control and mixing consoles, video monitors, video projectors, projection screens, and equipment racks included in the system. In the event floors are sloped or not level, the Customer is responsible for making the floor level under consoles and equipment racks. In the event a projection screen is recessed in a finished ceiling, the Customer is responsible for refinishing the ceiling.
- f. Providing a clear area with adequate ventilation and air conditioning that maintains a room temperature not exceeding 75 degrees Fahrenheit in all rooms that are occupied by sound/audio/video/lighting equipment racks. Sound, audio, video, and lighting equipment produces heat which must be dissipated by ventilation or air conditioning. Prolonged operation at room temperatures above 75 degrees Fahrenheit will shorten the life of electronic equipment leading to premature failure of components.
- g. The Customer is responsible for the installation and registration of all software on OFE computers. Ford will provide the Customer with the system requirements for Ford provided software, but the Customer is responsible for installing it on the OFE PC's and/or OFE network. All software-related customer support shall be directly provided by the software manufacturer.

- b. The Customer will provide a contact person that is authorized to answer questions and obligate the Customer if additional services are requested. The contact will be personally available to meet with the Ford technician and have knowledge of the equipment and systems to be inspected. The contact person will provide access to all areas and equipment rooms requiring inspection.

C. INSTALLATION SCHEDULE

- 1. Ford estimates that the actual on-site installation, test out and commissioning of this project will take three (3) weeks. In addition to the installation, Ford shall prepare system drawings, purchase the equipment, assemble the equipment in our shop, program control software as required and do in-shop testing. This work will take approximately ten (10) to twelve (12) weeks prior to the beginning of actual installation at your facility. The total time required to complete the project shall be approximately fifteen (15) weeks from agreement execution. The completion of Ford's work depends upon the facility being secure, dust-free, air-conditioned, and quiet.
- 2. For Ford to meet the above completion schedule, it is important that the Customer ensures the job site is available for Ford personnel, and there are no interruptions in the availability of the job site and the ability of Ford to do the work. Ford schedules its work force weeks in advance in order to meet the installation completion dates of all of its customers. As a consequence, it is vital that the Customer notify Ford's Project Manager in the event that the Customer changes the schedule or the Customer's other contractors fall behind in completing their portion of the work.

NON-HIRE: The Customer and Ford mutually agree, because of the high cost of training an employee, that neither party shall solicit the employment of any employee of the other party, and shall not employ any employee or any person who was an employee of the other party at any time during the relationship between the parties or for a period of one (1) year following the termination of any relationship between the parties. In the event of a breach of this section, the breaching party agrees to pay the other party an amount equal to the hired employee's annual wages as an agreed upon cost to replace the employee.

F. GUARANTEES AND LIMITATIONS OF WARRANTIES

1. FORD GUARANTEES THE FOLLOWING:

- a. Equipment will be new, unless noted otherwise.
- b. All workmanship provided by Ford will be free of defects and will be repaired, free of charge, for a period of one (1) year from the date of substantial completion or the first date of beneficial use of the system, whichever date occurs first. Substantial completion shall be defined as the point where the work, or designated portion thereof, is sufficiently complete so that the system can be used for its intended purpose.
- c. All equipment and materials provided by Ford that were manufactured by other companies will be warranted under the standard warranty terms of the original manufacturer.
- d. The warranty does not include nor cover expendable materials used with the system installation (e.g., light bulbs, lamps, light fixture lamps, fuses, batteries, portable connection cables, etc.).

- e. Ford is not responsible for the reliability of systems that communicate using wireless technology. The performance of equipment utilizing wireless communications is inherently unreliable and will experience "drop outs", distortion and loss of connectivity from time to time. Interference from other forms of radio frequency transmissions, such as radio and television broadcasts, cell phones, and computer wireless networks, is probable and should be expected.
- f. Ford is not responsible for the performance, testing, or configuration of owner-furnished data networks that are used to transmit audio, video, and lighting program data and control signal data. IP-based videoconferencing systems rely upon data networks that can provide consistent bandwidth for the transmission. Videoconferencing that is transmitted over the Internet is subject to the intermittent and unreliable nature of the public network. In the event that the Customer's network is found to be the cause of defects in the quality of the audio/video signals, is unreliable, or has insufficient bandwidth to support the A/V/L system and Ford's network engineers are required to troubleshoot or configure the Customer's network, the cost of this service will be invoiced to the Customer.
- g. The term "Software" as used in this document includes all editable source files, un-editable compiled files, graphical user interface files and functionality, audio digital signal processor (DSP) files, in whole and in part, produced under the terms of this agreement.

Unless otherwise expressly agreed in writing, all Software created by Ford remains the property of Ford, and the Customer is hereby provided a license to use the Software for this project only. The Software may not be used on any other project, nor used for any purposes outside of this project, nor shared nor disclosed to anyone who is not an employee of the Customer's company.

- h. Any adjustments made by the Customer or the Customer's agent(s), other than routine operational adjustments, shall not be covered under this warranty statement. Re-calibration of settings shall be considered by Ford to be billable time to the Customer at Ford's standard engineering rates.
- i. Procedures such as routine preventative maintenance functions (e.g., keeping filters clean, keeping system environment free from foreign materials, etc.) are the responsibility of the Customer and is not included within this warranty agreement. Failure on the part of the Customer to perform these routine maintenance functions shall void this warranty.
- j. If warranty work is necessary within the warranty period, Ford will, at its option, repair the defective equipment or return it to the manufacturer for repair.
- k. Repairs, modifications, or other work performed by personnel not authorized by Ford during the period of warranty on any equipment of the system may invalidate the warranty.
- l. Ford will not be responsible for damages or cost of repairs due to modifications, adjustments, or additions to the system performed by personnel not authorized by Ford prior to acceptance of the system by the Customer.
- m. Ford may withhold warranty service in the event that the Customer has an unpaid balance due to be paid to Ford.

2. OWNER-FURNISHED EQUIPMENT (OFE):

- a. Ford's intent is to provide a complete system including all equipment. In some cases, the Customer may own equipment which they desire to be included with the installation. Ford identifies this as OFE.
- b. The use of OFE is solely for the convenience of the Customer and is not included in the warranty or guarantee provided.
- c. Ford shall take reasonable care in handling OFE and install it according to standard industry practices; however, Ford takes no responsibility for the operation, performance, appearance, or effects of OFE before, during, or after its integration into the system. Ford reserves the right to accept or reject OFE based on the equipment's service record, or lack thereof, poor condition, or out of date software/firmware. Ford will not accept OFE that is purchased by the Customer to replace equipment that is specified in this proposal.
- d. In the event that OFE does not function properly, Ford shall notify the Customer to determine if the OFE is to be a) repaired, b) an alternate unit provided by the Customer, c) the unit is not to be used, or d) Ford is to provide a new unit. Ford shall provide a cost to the Customer for the work to be done. The Customer will authorize any additional costs to the job.
- e. The existing equipment, removed as a courtesy by Ford, that is not being reused, shall be handed over to the Customer. Ford is not responsible for the existing equipment or its condition when received by the Customer.

G. TRAINING AND DOCUMENTATION

1. TRAINING INCLUDED:

- a. Ford will host a training session near the completion of installation. All system users and interested persons should attend this training so that all questions can be answered during this training.
- b. During the training, if requested, Ford personnel will attend the initial first use of the system and assist the Customer's operators and users in the operation of the Ford-installed system.
- c. Ford shall provide a training agenda for scheduled training.
- d. Ford shall provide a quick start guide (QSG) for each room type. The QSG is a generic, brief description, of how to operate the system. One (1) copy of a laminated document, for each room type, shall be provided to the Customer.

2. ADVANCED TRAINING - OPTIONAL:

Ford is committed to providing the highest quality and most modern training experience possible to its Customers. In addition to the training included with this project, for an additional fee, Ford offers multiple, customizable options to fit the needs of any Customer. The possible programs include:

- a. Ford shall supply a training video consisting of a visual tutorial or tutorials, if multiple room type videos are purchased, that will explain how to operate specific AV systems. This training tutorial, narrated by a Ford trainer, is a self-paced, always-available, online video, viewable on any mobile device which give the learner a step-by-step process on how to use the technology.
- b. In consultation with the Customer, Ford will develop and execute a custom curriculum and curriculum schedule.
- c. Ford will provide in-person presentation(s), as needed, including presentation materials such as PowerPoint or Prezi presentation.
- d. Ford will develop a custom Orientation & Operations Handbook, which shall include detailed, user-friendly information on solutions, functionality, troubleshooting, curriculum, and other useful reference materials.
- e. The Ford Training Center also highly recommends follow-up training sessions six months to a year following the initial session(s) to ensure that all concepts are anchored and being employed by each user as well as providing opportunities for new employees to receive the same level and style of training existing employees received. The Ford Training Center will work with customers to develop a long-term training strategy and/or ongoing training curriculum.
- f. Additional materials include documents in electronic format, additional hard and/or laminated copies of Quick-Start Guides and Orientation & Operations Handbooks, as well as CDs or DVDs of these curriculum materials.
- g. All training curriculum and components will be developed and executed by a Ford Master Trainer.
- h. The components of the optional training are to be determined by the Customer, Account Manager, and Ford Master Trainer to best meet the needs of the Customer. The cost of the additional materials and training is based on the desired program.
- i. Please contact Ford to receive a customized price quote on the Advanced Training Program option.

H. BUILDING CONSTRUCTION AND SYSTEM INSTALLATION

1. VISUAL INSPECTION:

- a. This proposal is based upon a visual inspection of the site conditions. It is agreed that some buildings may have inherent design and/or construction that is not visibly recognizable and is outside of normal standard and customary building procedures. If the walls, floors or ceiling are found to be constructed in a manner that wire cannot be pulled or equipment cannot be mounted or otherwise installed without labor or materials in excess of those anticipated by both parties and proposed herein, the Customer agrees to be responsible for any adjustments in the labor and materials required to perform the installation.

2. EXISTING CONDITIONS:

a. Acoustics and Noise

In facilities where Ford is providing a sound or audio system, the Customer is responsible for providing an environment free of ambient noise and excessive reverberation and echoes.

- 1) Typically, ambient noise is created by HVAC systems (Heating, Ventilation, and Air Conditioning), plumbing or other mechanical systems in the building. In general, Ford recommends that the ambient noise sound pressure level not exceed NC35 (Noise Criteria) or 35 dB A scale.
- 2) Long reverberation times and echoes are normally the result of hard wall, floor, and ceiling surfaces found in some rooms. Typically, Ford recommends that the reverb time does not exceed 1.5 seconds where the primary use is the communication of speech. The production of other types of music may require longer reverberation times. In the event that echoes exist, absorptive or diffusive wall and ceiling panels may be required to eliminate or minimize the detrimental effects of the echoes.
- 3) Ford is not responsible for any costs related to reducing the ambient noise or modifying the acoustics of the Customer's facilities.

I. ACCEPTANCE

1. The Customer's personnel will be notified by Ford upon completion of the installation.
2. Demonstration of system performance will be during the training session.
3. Participants at the performance demonstration shall include personnel representing Ford and personnel representing Medina Valley ISD who are authorized to accept the system as complete and make final payment.

This proposal shall not be deemed as accepted by Ford until the executed contract is returned to Ford's Credit Center for final review and acceptance. If a purchase order is required by the Customer, it must be transmitted with the signed install agreement for review and acceptance.

This proposal contains confidential pricing, design, engineering, and installation information that is proprietary to Ford. It is provided for your private use, and is not to be disclosed, in part or in whole, without the express, written authorization of Ford.

We appreciate the opportunity to work with you on this project. If you have any questions or need additional information, please contact me at 512-447-1103.

Date: May 13, 2020

Board Goal 4 for 2020 is "Increase access to and participation in extra- and co-curricular activities." Item 4B of the 2020 Superintendent Evaluation Document is "During the prior evaluation year, the superintendent conducted a study on expanding middle school athletic offerings to possibly include tennis and soccer. The results of that study were presented to the Board." The study was conducted and the results were reported to the Board at the April 20, 2020 regular board meeting. The survey showed significant interest in expanding middle school athletic offerings to include soccer. This would be a great addition to our middle school athletics programs and would help prepare students for high school soccer. Coach Crisp has provided a summary of the program in the attached memorandum.

Superintendent Recommendation: Approve the addition of middle school soccer for the 2020-2021 school year.

MEMORANDUM

From: Lee Crisp, Athletic Director
Re: Middle School Soccer Proposal
Date: May 12, 2020

- Our middle school athletic conference has included a soccer season for the spring of 2021.
- Season begins following district track meet and will run for 6 weeks (April/May).
- Games will be played on Thursdays, 1 game/week.
- As a start-up program we would look to field 1 team/grade level on the boys and girls side at each campus (8 teams total)
- 1 coach would be needed on the boys side and girls side at each campus.
- I would like to provide a stipend of \$2,000/coach.
- Price of home/away uniform (25) for each team (MVMS 7B, 7G, 8B, 8G; LAMS 7B, 7G, 8B, 8G) would be around \$3,400. (Shorts included)
- MVMS will have access to soccer goals, LAMS would need soccer goals purchased, around \$4,000 for a pair.
- It would be necessary to purchase around 100 soccer balls (50/campus; 25/team) in order to conduct practices. Would cost around \$2,000 for all balls.
- High school coaches would work with MS coaches to help organize practices and become familiar with rules of the game. (MS season will occur after HS season has ended.)
- I believe we will be able to service a niche of athletes at the middle school that is a growing population. Providing this opportunity will also benefit our high school programs with regards to participation and experience.

Estimated Cost of Program

Coaching Stipends	4 x \$2,000	\$ 8,000
Uniforms		\$ 3,400
Goals for LAMS		\$ 4,000
Soccer Balls		<u>\$ 2,000</u>
Total Estimated Cost		\$ 17,400

Re: Consider MVISD Gifted and Talented Plan
Date: May 14, 2020

TEA recently updated the Texas State Plan for the Education for Gifted/Talented Students. The purpose of presenting this G/T plan to the board this evening is two-fold. One, to make all stakeholders aware of programming changes being made to better align with the newly updated Texas State Plan for the Education of Gifted/Talented Students, and two, to make recommendations for additional G/T support as the district continues to grow.

Activity 2C in the 2020 Superintendent Evaluation Document requires that "during the prior evaluation year, the superintendent presented to the Board a Gifted and Talented plan and framework."

Superintendent Recommendation: Approve the addition of middle school soccer for the 2020-2021 school year.

What is Cluster Grouping?

“... Cluster Grouping Model represents a method for providing full-time academic services to gifted students with no financial impact to the district. ...*All* students are grouped based on their ability and achievement levels. Classroom compositions are carefully structured with two main goals: to ensure a balance of abilities in all classes in the grade level, and to reduce the learning range found in any given classroom.

Gifted-identified students are purposefully placed into mixed ability classrooms. Ideally, a group of four to nine gifted students is clustered with a teacher who has had—or will receive—training in understanding and responding to their exceptional learning needs. When there are ten or more gifted students in a grade level, a second gifted cluster class may be designated. Grouping gifted students together helps teachers challenge them more easily. High-achieving students (who are not identified as gifted) are placed into the other classes at the grade level so that all classes include students of high ability and high achievement (Winebrenner & Brulles, 2008)”

Why Cluster Group?

- The most neglected student in heterogeneous classrooms (in terms of reaching his/her true full potential) is the student who is gifted in Mathematics, Robison (1998).
- Gifted students in gifted cluster classes demonstrated consistently significant achievement growth regardless of demographic group, Brulles, Cohn, and Saunders (2010).
- Gifted students who were grouped into classes with other gifted students learned more in a year than students who had classmates of varying abilities, Swiatek (2001).
- Achievement of gifted cluster attributed to more complex and challenging curriculum, as well as to receiving more teacher attention, Saunders (2005).

Elementary Framework

- Cluster Arrangement for GT Students (4-10 per group) for core content areas
 - Provides appropriate grouping arrangements & still offers a heterogeneous classroom
 - Allows for more differentiation of curriculum with depth of instruction
 - Additional required training in late July for cluster teachers & math specialists
 - Expectation/Monitoring of advanced rigor in academic classes
- Push-In K - 1 (Gifted Specialist)
 - Expose all students to higher-level thinking (Depth & Complexity)
 - Aids with identification of gifted students
- Pull-Out 3-5 (Gifted Specialist)
 - Problem based learning projects to create advanced level projects

Next Steps: Consideration of subject-based acceleration in mathematics. 2022 beyond

GT Elementary Support Model

- GT Specialist
 - Liaison between Central Office and GT cluster teachers
 - Shared collaboration (planning and/or teaching) with cluster teachers
 - Support for cluster teachers in differentiating for gifted learners in core content areas
 - May be designing critical thinking enrichment lessons/activities for classes to use (possibly in lieu of pull-out enrichment sessions)
 - There should be SOME time built into schedule to be in these classrooms
 - Maintain pull-out component
- Classroom Cluster Teacher
 - Provides differentiated instruction in core content areas
 - Social/emotional support
 - Depth of Instruction to better meet GT student needs

Middle School Framework

- Opportunities for Advanced level academics in core classes (advanced level curriculum still needs to be differentiated for gifted students)

 - Honors/Advanced Placement ELA
 - Honors/Advanced Placement Science
 - Honors/Advanced Placement Social Studies
- Opportunity for G/T research/project support during collaborative period

- Classroom Teachers
 - Provide more rigorous differentiated instruction
 - Additional required training

High School Framework/GT Support

- Major Differences: Options/ Projects/ Teacher Training
- Monitoring class selections for acceleration
- GT identification/assessment

Supporting GT State Plan Standards

1.6 Long-range evaluation of services is based on evidence obtained through gifted/talented-appropriate performance measures such as those provided through the Texas Performance Standards Project (TPSP).

1.7 The development and delivery of curriculum for gifted/talented students is monitored regularly by trained administrators.

3.1 Identified gifted/talented students are assured an array of learning opportunities that are commensurate with their abilities and that emphasize content in the four (4) foundation curricular areas. Services are available during the school day as well as the entire school year. Parents are informed of these options (19 TAC §89.3(3)).

3.3 Services for gifted/talented students are comprehensive, structured, sequenced, and appropriately challenging, including options in the four (4) foundation curricular areas.

3.4 Gifted/talented students are ensured opportunities to work together as a group, work with other students, and work independently during the school day as well as the entire school year as a direct result of gifted/talented service options (19 TAC §89.3(1)).

3.5 Flexible grouping patterns and independent investigations are provided throughout the program design/services.

3.8 Acceleration and flexible pacing are employed, allowing students to learn at the pace and level appropriate for their abilities and skills, and are actively facilitated by district administrators, counselors, and teachers.

3.11 Develop and implement services to address the social and emotional needs of gifted/talented students and their impact on student learning.

Supporting GT State Plan Standards

- 4.2 Opportunities are provided for students to pursue areas of interest in selected disciplines through guided and independent research.
- 4.3 A continuum of learning experiences is provided that leads to the development of advanced-level products and/or performances such as those provided through the Texas Performance Standards Project (TPSP) (19 TAC §89.3(2)).
- 4.4 Participation in the Texas Performance Standards Project (TPSP), or other experiences that result in the development of sophisticated products and/or performances that are targeted to an audience outside the classroom, is available through gifted/talented curricula.
- 4.5 Opportunities are provided to accelerate in areas of student strengths (19 TAC §89.3(4)).
- 4.6 Flexible pacing is employed, allowing students to learn at the pace and level appropriate to their abilities and skills.
- 4.7 Scheduling modifications are implemented in order to meet the identified needs of individual students.
- 4.9 Educators adapt and/or modify the core or standard curriculum to meet the needs of gifted/talented students and those with special needs such as twice-exceptional, highly gifted, and English learners.

Under HB 3, school boards are required to adopt plans in early childhood literacy and math, as well as college, career, and military readiness. All plans are required to include:

- At least one assigned district-level administrator or employee of the regional education service center for the district's region to coordinate implementation and submit annual report to the board on the district's progress;
- An annual review by the board at a public meeting;
- An annual report posted on district and campus websites; and
- Specific, quantifiable, annual goals for five years at each campus.

Early childhood plans are required to include:

- Annual goals for aggregate student growth on 3rd grade math and reading STAAR;
- Annual targets for students in each group evaluated under closing the gaps domain;
- Targeted professional development for classroom teachers in kindergarten through 3rd grade for campuses that the board identifies as not meeting the plan's goals and that considers the unique needs of students in bilingual education or special language programs.
- Annual targets that may be set for students in bilingual or ESL programs.

Superintendent Recommendation: Adopt the Plan for Early Childhood Literacy and Mathematics (EC-LM).
